## **COVID-19 Data Update October 21, 2021**

**Data only**

\*Please note that this data is preliminary and subject to change.

**Carroll County  
Health Department**

**Public Health**  
Prevent. Promote. Protect.

# Levels of community transmission as defined by the CDC:

- Total new cases per 100,000 in past 7 days: low <10, moderate 10-49, substantial 50-99, high  $\geq 100$
- Percent positive tests in past 7 days: low <5%, moderate 5-7.9%, substantial 8-9.9%, high  $\geq 10\%$
- If the two indicators suggest different transmission levels, the higher level is selected.

Total new cases per 100,000 this week:  
84.9 - substantial  
Down 35.6 from last week

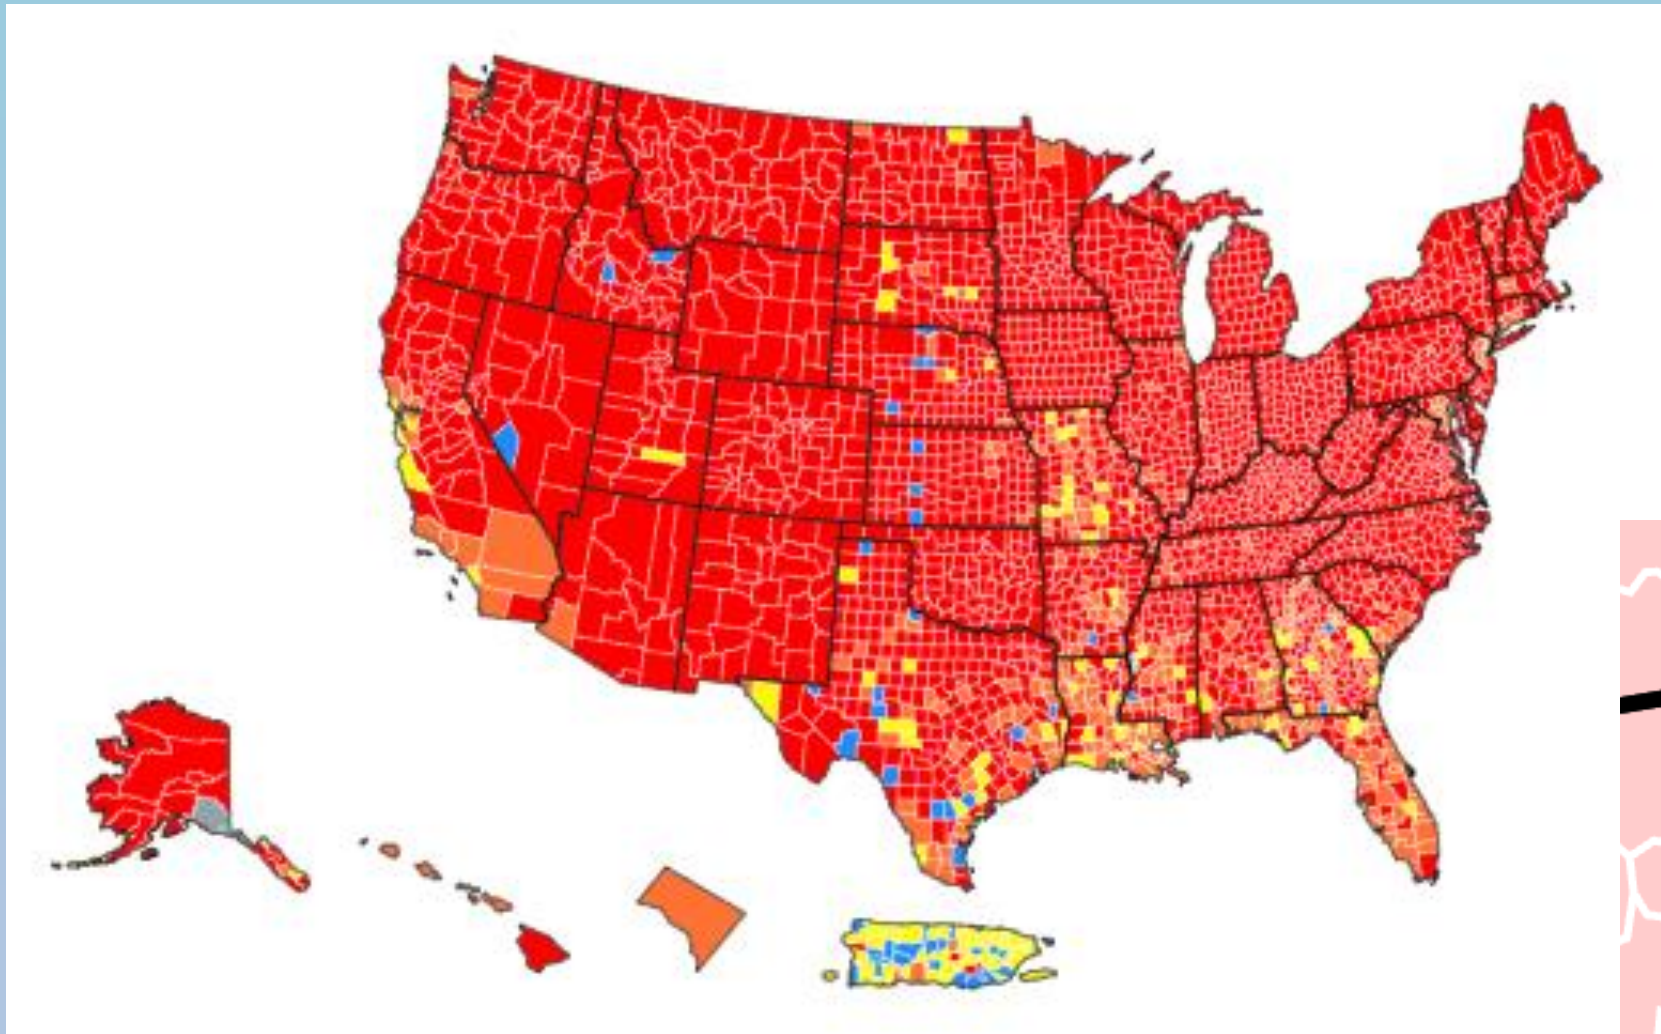

Positivity rate in Carroll County:  
4.56%  
- low

Down 0.71% from last week

# CDC Transmission Level Data

High (red), substantial (orange), moderate (yellow), and low (blue)

Carroll County is in substantial transmission

## All COVID-19 Cases by Report Week

Confirmed Probable

## Probable cases

- Probable cases are those who test positive with an antigen test, not a PCR test.
- Probable cases are not included in our confirmed case totals (PCR test only).
- Cases that are confirmed with PCR tests are removed from the probable totals.
- Week of 5/9 high due to lab submitting multiple weeks of past reports.

Please note: community cases only

Community COVID-19 Case Rates by Age Group and Report Week

## Post-Vaccination Infections

Although there are cases of people who become sick after they are fully vaccinated, cases where fully vaccinated people are hospitalized or die from COVID-19 are rare and vaccines remain the best way to prevent COVID-19 and its complications.

Maryland’s first post-vaccination infection was identified on January 26, 2021. The graphs reflect Carroll County cases reported from January 26 – October 16, 2021. The numbers are case rates per 100,000, not number of cases. All data are preliminary and subject to change based on additional reporting.

**Maryland's first post-vaccination infection was identified on January 26, 2021. This information reflects cases tested in Carroll County from January 26 - October 16, 2021.**

107,089 (63.6%) of all Carroll County residents have been fully vaccinated as of October 19, 2021.

There have been 662 COVID-19 cases among fully vaccinated Carroll County residents and 3885 cases in residents who are not fully vaccinated since January 26, 2021.

Of those fully vaccinated cases, there were:

- 57 cases hospitalized, representing 15% of all COVID-19 cases in Carroll County who were hospitalized since January 26, 2021
- 15 deaths, representing approx. 23% of all lab-confirmed COVID-19 deaths in Carroll County since January 26, 2021\*

\*Because our number of deaths is low, it is difficult to make conclusions based on vaccination status.

Approximately 14.5% of all confirmed COVID-19 cases in Carroll County since January 26, 2021 have been among fully vaccinated individuals.

## Hospitalizations by Report Week: All COVID-19 Cases

This graph shows hospitalizations by week for COVID positive Carroll County residents, in any hospital.

- Report week is the week their case was reported, which may not be the same week they were hospitalized. Only one hospitalization is noted per person.
- There is a slight data lag so recent numbers may increase.
- Additional hospital data can be found on our website:  
<https://cchd.maryland.gov/carroll-county-md-cases/>

**Hospitalizations and Deaths by Age Group (years): All COVID-19 Cases**

Note: Red numbers indicate total cases added since last week.

## COVID-19 Deaths by Week of Death

Please note:

- This data does not include deaths in probable cases.

## Covid-19 Vaccine Doses Administered by CCHD\*

1 <sup>st</sup> doses administered	27,426
Single-doses J&J	699
2 <sup>nd</sup> doses administered	26,211
Additional doses	229
<b>TOTAL DOSES ADMINISTERED</b>	<b>54,565</b>

As of October 19, 2021

# % Carroll County Population Vaccinated, by Week

— % ≥ 1 Vaccine Dose    — % Fully Vaccinated

This table shows the percentage of the total population (all ages including children) who are vaccinated: 66.9% partially and 63.6% fully vaccinated.

## % Vaccinated by Age Group

## Percent COVID-19 Vaccination Estimates by Race/Ethnicity: Aged 20+ Years

# Vaccination Clinics

**Come to a Health Department clinic, 290 South Center St., Westminster**

- **Tuesdays 10:00 am to 12:00 pm**
- **Fridays 1:00 to 3:00 pm**

**Anyone 12 and up can be vaccinated at these clinics (Pfizer is still the only vaccine approved for use in ages 12-17).**

**Offering 1<sup>st</sup>, 2<sup>nd</sup>, and 3<sup>rd</sup> doses for people who are immunocompromised.**

All links shared on our website.

## Booster shots:

- **We cannot offer booster shots at our Health Department clinics due to capacity issues, so we have scheduled off-site clinics.**
- If you are a group for whom booster shots were approved, and you received your 2nd Pfizer shot at least 6 months ago, you may get a booster shot through your healthcare provider, pharmacy, or one of our booster clinics:

**South Carroll Senior and Community Center**

**[Thursday, October 21, 2021 2:00 PM to 6:30 PM](#)**

**North Carroll Senior Center**

**[Thursday, October 28, 2021 2:00 PM to 6:30 PM](#)**

Register here: **<https://cchd.maryland.gov/covid-19-booster-shots/>**

Booster shots for Moderna and J&J will be approved soon. We will be offering Moderna clinics at different locations around the county.

Booster shots are currently only authorized for Pfizer. Per the CDC:

Who should get a Pfizer booster:

- people 65 years and older
- residents of long-term care facilities
- people 50 to 64 years old who have an underlying medical condition.

Who may get a Pfizer booster:

- People 18 to 49 with underlying medical conditions
- People 18 to 64 who are at an increased risk because of their job or living in congregate setting

Boosters are to be given at least six months after people get their second doses of the Pfizer vaccine.

The CDC will be reviewing data in the coming weeks and will make recommendations about those who got the Moderna and Johnson & Johnson vaccines.
